

Environmental Policy – Rapid Granulator AB

- *Rapid is contributing to a reduced environmental impact through continual improvements. Both in our production and through the material recycling made by Rapid granulators throughout the world.*
- *Rapid is committed to support the customer in its use of the product to reduce the environmental impact during the product's entire lifecycle.*
- Each employee should have an environmental mindset enabling a reduced environmental impact from the company activities.
- The environmental strategies, policies and activities at Rapid should lead to compliance obligations, reducing the company environmental impact and preventing pollution.
- Rapid should design and develop products with a long durability to reduce the material and resource consumption required for the production.

Rapid Granulator AB
